

SUMMER WONDER 2012

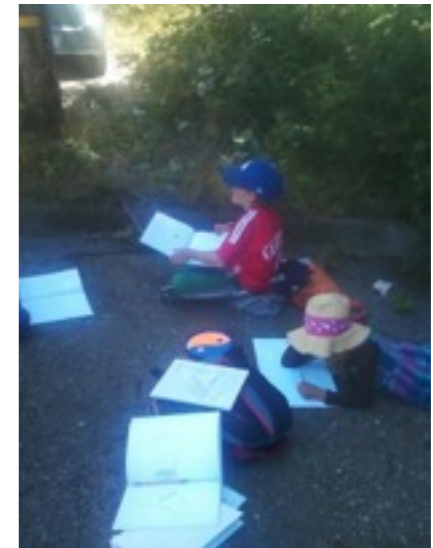

Summer Wonder is at it again! Sean Riordan, Melanie Kohler, both California State credentialed teachers, along with their children Sophia and Aidan, are getting ready to have all that fun again with old favorites, new adventures and projects.

This summer, projects will include experimenting with a variety of art materials, daily excursions that involve sketching in nature journals, playing school yard games, sewing, harvesting food from the garden, cooking a variety of recipes, and a few more surprises.

Last year we started a summer camp that focused on active, engaging projects with an Art and Science perspective. Whether we were drawing animals from observation, exploring the open spaces in our neighborhood, or working in the kitchen, we were actively working with our bodies, our minds, and our sense of wonder.
